

# CLOSET WORKS™

More than closets

Closet Works was founded in 1987 and has since been setting the standard for excellence in premium closets and personal spaces for all of the Chicagoland area.

Closet Works has been designing and building closets in Chicago for Chicagoans for over 30 years. The company began with humble beginnings, offering white laminate closets with the distinction that the product was designed and manufactured locally to meet the clients' space needs. Custom closets, a business then in its infancy, proved to be a popular concept. Sales took off – while the number of product lines and options simultaneously increased. With an eye towards additional expansion across the Chicago market, the business was purchased by the Happ family in 2012. Although the company has evolved into the largest provider of custom organization solutions in the Chicago metro area, everything is still designed and manufactured locally at our factory in Elmhurst, IL. Closet Works' line-up of products has grown to include custom storage and organization systems for every room of the home and for businesses as well. We also offer the widest range of materials, colors, finishes and accessories for all of our systems. Examples of our products are on display in our Chicago showroom at 2112 North Clybourn Avenue.

Closet Works is a home storage solutions and closet organization company serving Chicagoland. From walk-in closets to home offices, wall beds and garages, Closet Works has organized closet systems that have been thought out and tested for over three decades.

# Our Process

At Closet Works, our well trained and friendly team makes the process of getting your dream custom closet or organization system easy and enjoyable.

## 1. CONSULTATION:

The process starts with the free in-home consultation with one of our award-winning designers. This step is used to help our team learn more about the space and its specific requirements.

## 2. DESIGN PROCESS:

Next, the design team works together to create a 3D rendering of the new space and a proposal which includes choices for the materials, finishes and a competitive estimate for the project.

## 3. FABRICATION:

After final designs are approved, our team begins constructing and fabricating each of the system components. Each piece is made in house, and run through quality control protocols.

## 4. INSTALLATION:

The professional and friendly installers go to the home and set up the custom system to the designer's exact specifications. Most systems are installed in one day, with no mess ever left behind.

**Our Promise:** At Closet Works we are committed to excellence. We not only guarantee our product, but we guarantee the experience.

- Superior Craftsmanship
